SUMMARY

AI-native growth and optimization expert. At Salesforce, shipped recruiting automations saving 1,400+ hrs/year, prototyped agentic solutions (Claude API, Agentforce — Agentblazer Champion certified), and led AI Research brand strategy. Grew startup Ditto to 120,000+ organic users, 50M+ organic views, and national press in Bloomberg, LA Times, and NY Post.

EDUCATION

University of California, Berkeley | Berkeley, CA | Expected May 2027

B.A. in Analytics (Industrial Engineering & Operations Research Management)

PROFESSIONAL EXPERIENCE

AI Optimization Intern — Salesforce | Jun 2026 – Present

- Authored competitive intel and a Campus Ambassador proposal — covering 7 competitor companies across 6 partner schools — that directly informed a budget ask presented to Marc Benioff, Salesforce's CEO, shaping recruiting strategy for the 2027 season
- Engineered a HackerRank → Google Sheets automation via Google Apps Script, eliminating 15,000 manual clicks and saving ~1,440 hrs/year — deployed across Builders and SWE hiring pipelines in AMER and LATAM, with global expansion underway
- Built a cross-spreadsheet candidate invite automation syncing candidates on status change across AMER and LATAM — saving ~5 min per candidate (~25 hrs/season at full scale) — deployed on live production sheets across 6 subtabs with plagiarism detection and manual override protection; authored two reusable Slackbot skills for future use
- Built and shipped 3 full-funnel recruiting dashboards (Builders Program, FY27–28 Partner School Hiring, Offer Dashboard) giving leadership real-time visibility into pipeline health, pass rates, and offer attainment across AMER + LATAM
- Identified and quantified ~75 hours of manual candidate-processing time (647+ Builders candidates at ~7 min each) as the basis for a proposed automation, with additional legal, finance, and sales pipelines flagged for the same fix
- Conducted an 8-stage Talent Attraction workflow audit (Pre-Sourcing → Disposition) grounded in 10+ stakeholder interviews and sourcing shadows, identifying friction across HackerRank, TRM double-entry, and a 17% offer renege rate
- Prototyped agentic solutions with LLM-based tooling (Claude API, Agentforce) and shipped an AI Recommendation Playbook with a live proof-of-concept agent demo, applying PM scoping and stakeholder alignment — Salesforce Agentblazer Champion certified
- Selected by VP leadership to scope a global competitive-intelligence build across 25 top international CS programs (Toronto, Oxford, Cambridge, ETH Zurich, Tsinghua, U. Tokyo), extending prior work that had already informed a CEO-level budget ask — covering pipeline, TAM, curriculum/AI-coursework trends, and competitor benchmarking
- Shipped a v2 enhancement (Auto-Copy Passed Candidates) to the HackerRank automation, adding dedup logic that auto-pushes passed candidates into the Interview Tracking sheet — cutting 2–3 min of manual copy/paste per candidate — rolled into both the APM and SWE workflows
- Audited a 103-task Asana → email → scheduling process end-to-end and proposed eliminating the intake form step entirely — an est. ~15% task reduction in favor of direct routing — a process-simplification win distinct from the automation-build track
- Publicly recognized for automation-driven process improvement: featured in an Intern Spotlight and called out in a National Intern Day shoutout for automation work, campus intel, and the workflow audit

AI Research Brand & Marketing Intern (Contract) — Salesforce | Mar 2026 – May 2026

- Selected to represent Salesforce at TDX Developer Conference, embedded with the AI Research department to lead marketing across X, short-form content, and brand positioning for flagship research releases; created 10+ videos shared internally and externally
- Owned X (Twitter) strategy for Salesforce AI Research (20,000 followers) — drafting tweet threads and shaping the public-facing narrative around ambient intelligence, eVerse simulation environments, and the Agentic Enterprise
- Produced and directed short-form marketing content for TDX — TikTok scripts, hype videos, pre-event teasers, and on-the-ground researcher interviews — driving session attendance and AI Research visibility across a global developer audience
- Translated deep-technical research (agentic systems, simulation, ambient AI) into accessible content hooks and brand positioning, partnering directly with AI scientists to align cutting-edge work with Salesforce's enterprise narrative

Founding Head of Growth & Regional Director, NorCal — Ditto | Jun 2025 – Mar 2026

- Owned end-to-end experiment lifecycle (ideation → launch → performance analysis → iteration) for a consumer AI product, using engagement metrics to prioritize builds and kill underperforming features
- Quadrupled Ditto's user base within one month (1K → 4K) and captured 10% of UC Berkeley as active users, scaling NorCal outreach and onboarding to 120,000+ organic users across 15+ U.S. colleges
- Ran a breakout growth experiment validating product messaging and positioning — 2M+ views, 150K+ likes — translating into a sustained lift in top-of-funnel conversion and activation
- Secured national media coverage in Bloomberg, LA Times, and NY Post, driving brand visibility and top-of-funnel growth

- Planned and executed on-the-ground marketing campaigns, events, and contests across NYC, LA, and the Bay Area, generating 20,000+ activations and 4M+ social media impressions
- Recruited and managed on-campus marketing teams across UC Berkeley, UC Davis, UCSB, and UCR; partnered cross-functionally with Rho (fintech) and DoorList (events) on joint outreach, leveraging employee-generated LinkedIn content
- Supported seed-stage product ops during a \$10M raise; synthesized user feedback, competitive landscape, and engagement data into roadmap recommendations for leadership

Growth & Content — Cluely, TurboLearn AI, DoorList | Jun 2025 – Apr 2026

- **Cluely:** Managed viral UGC campaign that amassed 38M+ combined TikTok views in 6 weeks, producing 1,500+ videos and adding 220K+ followers across affiliated accounts
- **TurboLearn AI:** Created short-form content under creative director Eric Ou; produced two breakout videos totaling 3M+ views and 300K+ likes, driving sustained follower growth
- **DoorList (GTM Content Director):** Directed influencer and social content campaign (March Madness) surpassing 2M+ views; managed creator coordination and ambassador recruitment via Trello/Notion

Head of U.S. Public Relations & Product Launch — Agnes AI | Sep 2025 – Feb 2026

- Led U.S. market launch for Agnes AI (\$100M valuation, 3M users), launching the product from Asia into the U.S. market through integrated GTM, UGC, and PR workstreams
- Owned localization, positioning, and launch sequencing; coordinated across engineering, design, and PR to execute a phased rollout
- Coordinated with major outlets including a16z-affiliated media; owned global UGC strategy and integrated into a 1M+ ARR community

Co-founder & CFO — Polymath Arena | Jun 2025 – Present

- Co-founded gamified SAT/ACT prep platform; scaled to 4,100+ students, 250K+ site visitors, 15M+ organic views, 6.2% churn, and \$1.2K MRR with \$250/mo burn and 2.5% paid conversion. Advised by Sal Khan, founder of Khan Academy
- Scoped and specced product expansion into ISEE/AP test prep and a custom-lobby B2B SaaS offering for tutoring companies
- Won 1st place at Wharton, 2nd at Princeton TigerLaunch, and \$3K Kuzneski; raised \$8K pre-seed with active investor conversations at a16z, HSG, and Afore Capital

CERTIFICATIONS & SKILLS

Certifications: Building with the Claude API, Claude Code in Action (Anthropic, 2026); Google PM Specialization (2025); Salesforce Agentblazer Champion.

Skills: Project scoping & planning, cross-functional coordination, stakeholder alignment, status reporting, agentic workflow design, LLM tooling (Claude API, Agentforce); Python, SQL, NumPy, Google Apps Script, machine learning, hypothesis & A/B testing, regression, Bayesian inference; Notion, Trello, Google Sheets, Handshake, Workday.
