SUMMARY

AI, growth, and analytics-focused operator with experience spanning product experimentation, automation, GTM, and data-driven optimization. At Salesforce, shipped recruiting automations saving 1,800+ hrs/year, prototyped agentic solutions (Claude API, Agentforce — Agentblazer Champion certified), and led AI Research brand strategy. Personally gathered 50M+ organic views across 6 startups. Grew startup Ditto to 150,000+ organic users, 15+ U.S. colleges, and gained national press in Bloomberg, LA Times, and NY Post.

EDUCATION

University of California, Berkeley
B.A. Industrial Engineering & Operations Research (IEOR) — Expected May 2028
Data 8 — Foundations of Data Science; Data C88C — Computer Programming

PROFESSIONAL EXPERIENCE

Supply Chain & Procurement Analyst — UC Berkeley
Aug 2026 – Present

- Map multi-tiered apparel supply chains for Cal Athletics and university merchandise, tracing Tier 1–4 supplier networks across procurement, manufacturing, materials, and global sourcing logistics
- Build supplier intelligence and risk frameworks evaluating vendors across cost, quality, lead time, capacity, geographic concentration, resilience, and sustainability to identify supply chain risks and dependencies
- Analyze Scope 3 emissions, lifecycle impacts, transportation logistics, and operational data to quantify carbon footprints, identify supply chain hotspots, and inform sourcing and procurement decisions
- Develop data-driven procurement recommendations and supplier decision matrices balancing efficiency, responsiveness, resilience, cost, and sustainability for future university contracts
- Collaborate with Cal Athletics, Nike, Berkeley procurement, campus stakeholders, and corporate vendors to collect supplier data, evaluate sourcing options, and translate supply chain analysis into actionable operational recommendations

AI Optimization Intern — Salesforce
Jun 2026 – Aug 2026

- Authored competitive intel and a Campus Ambassador proposal — covering 8 competitor companies across 6 partner schools — directly informed a budget ask presented to Marc Benioff, Salesforce's CEO — shaping recruiting strategy for the 2027 season
- Engineered a HackerRank to Google Sheets automation via Google Apps Script, eliminating 36,500 manual clicks and saving ~1,800 hrs/year across — deployed across AI Builder, APM and SWE role hiring pipelines. Active globally: AMER, LATAM, EMEA, INDIA regions.
- Built a cross-spreadsheet candidate invite automation syncing candidates on status change across AMER and LATAM regions — saving ~5 min per candidate (~25 hrs/season at full scale) — deployed on live production sheets across 6 subtabs with plagiarism detection and manual override protection; authored two reusable Slackbot skills for future use
- Built and shipped 3 full-funnel recruiting dashboards (Builders Program Offers Dashboard + PM Hiring and Interview Funnel Dashboards) giving leadership real-time visibility into pipeline health, pass rates, and offer attainment across AMER + LATAM
- Built a Vlookup mapping automation identifying Top 20 CS school employees across 14,000+ raw records, cutting manual filtering time to instant lookup.
- Conducted an 8-stage Talent Attraction workflow audit (Pre-Sourcing → Disposition) grounded in 10+ stakeholder interviews and sourcing shadows, identifying friction across HackerRank, TRM double-entry, and a 17% offer renege rate

• Prototyped agentic solutions with LLM-based tooling (Claude API, Agentforce) and shipped an AI Recommendation Playbook with a live proof-of-concept agent demo, applying PM scoping and stakeholder alignment — Salesforce Agentblazer Champion certified

• Audited a 103-task Asana → email → scheduling process end-to-end and proposed eliminating the intake form step entirely — an ~est. 78% task reduction in favor of direct routing — a process-simplification win distinct from the automation-build track

• Identified and quantified ~75 hours of manual candidate-processing time (647+ Builders candidates at ~7 min/candidate) as the basis for a proposed automation, with additional legal, finance, and sales pipelines flagged for the same fix

• Selected by VP leadership to create a global competitive-intelligence report across 25 top international CS programs extending prior work that had already informed a CEO-level budget ask — covering hiring pipeline data, TAM, curriculum/AI-coursework trends, and event info. Built a monthly-recurring task that auto-runs my University Recruiting Target Schools Report skill against a locked set of live, refreshed sources.

AI Research Brand & Marketing Intern (Contract) — Salesforce
Mar 2026 – May 2026

• Selected to represent Salesforce at TDX Developer Conference, embedded with the AI Research department to lead marketing across X, short-form content, and brand positioning for flagship research releases. Created 10+ videos shared internally and externally.

• Owned X (Twitter) strategy for Salesforce AI Research (20,000 followers) — drafting tweet threads and shaping the public-facing narrative around ambient intelligence, eVerse simulation environments, and the Agentic Enterprise.

• Produced and directed short-form marketing content for TDX — TikTok scripts, hype videos, pre-event teasers, and on-the-ground researcher interviews — driving session attendance and AI Research visibility across a global developer audience.

• Translated deep-technical research (agentic systems, simulation, ambient AI) into accessible content hooks and brand positioning, partnering directly with AI scientists to align cutting-edge work with Salesforce's enterprise narrative.

Founding Head of Growth & Regional Director, NorCal — Ditto
Jun 2025 – Mar 2026

• Scaled NorCal outreach and onboarding to 150,000+ organic users across 15+ U.S. colleges within 2 semesters.

• Quadrupled Ditto's user base within one month (1K → 4K) and captured 20% of UC Berkeley as active users,

• Owned end-to-end experiment lifecycle (ideation → launch → performance analysis → iteration) for a consumer AI product, using engagement metrics to prioritize builds and kill underperforming features.

• Ran a breakout growth experiment validating product messaging and positioning — 2M+ views, 150K+ likes — translating into a sustained lift in top-of-funnel conversion and activation.

• Secured national media coverage in Bloomberg, LA Times, and NY Post, driving brand visibility and top-of-funnel growth.

• Planned and executed on-the-ground marketing campaigns, events, and contests across NYC, LA, and the Bay Area, generating 20,000+ activations and 4M+ social media impressions.

• Recruited and managed on-campus marketing teams across UC Berkeley, UC Davis, UCSB, and UCR; partnered cross-functionally with Rho (fintech) and DoorList (events) on joint outreach, leveraging employee-generated LinkedIn content.

• Supported seed-stage product ops during a $10M raise; synthesized user feedback, competitive landscape, and engagement data into roadmap recommendations for leadership.

Growth & Content — Cluely, SWSH, DoorList, TurboLearn AI
Jun 2025 – Apr 2026

• Cluely: Managed viral UGC campaign that amassed 38M+ combined TikTok views in 6 weeks, producing 1,500+ videos and adding 220K+ followers across affiliated accounts.

• DoorList (GTM Content Director): Directed influencer and social content campaign (March Madness) surpassing 2M+ views; managed creator coordination and ambassador recruitment via Trello/Notion.

• SWSH: Invented and led SWSH’s fan account growth strategy, 20x'd view counts for major artist fan accounts (TWICE, John Summit, Katseye, Hilary Duff, Zara Larsson); deployed autonomous AI agents for organic X engagement; Managed 5 high-leverage fan and update accounts driving 3M+ views in 4 weeks across Tiktok & instagram.

• TurboLearn AI: Created short-form content under creative director Eric Ou; produced two breakout videos totaling 3M+ views and 300K+ likes, driving sustained follower growth.

Head of U.S. Public Relations & Product Launch – Agnes AI
Sep 2025 – Feb 2026

• Led U.S. market launch for Agnes AI ($100M valuation, 3M users), launching the product from Asia into the U.S. market through integrated GTM, UGC, and PR workstreams.

• Owned localization, positioning, and launch sequencing; coordinated across engineering, design, and PR to execute a phased rollout.

• Coordinated with major outlets including a16z-affiliated media; owned global UGC strategy and integrated into a 1M+ ARR community.

Agency Founder – Global Entrepreneurs Hub
Sep 2025 – Feb 2026

• Created the GLO Creators modeling and talent agency. It was started to facilitate job placements through professional referrals. 100+ professionals, $100k+ in deals generated. The agency actively connects talent—including UGC Creators, Videographers, Editors, models, and Engineers—with opportunities. To be added to the database and receive jobs, individuals are required to submit a pitch detailing their desired role and proven achievements.

• GLO (Global Entrepreneurs Hub) is Silicon Valley's $1M+ ARR founder community ($8M ARR avg), serving as the essential networking platform for high-traction global founders. We connect fast-growing startups with the ecosystem's top founders, investors, and strategic partners through curated introductions and exclusive access. Helped organize multiple founder dinners with 20+ people and networking events

• 30+ UGC creators loaned out to over 10 brands

Co-founder & CFO — Polymath Arena
Jun 2025 – Jun 2026

• Co-founded gamified SAT/ACT prep platform; scaled to 4,100+ students, 250K+ site visitors, 15M+ organic views, 6.2% churn, and $1.2K MRR with $250/mo burn and 2.5% paid conversion. Advised by Sal Khan, founder of Khan Academy.

• Scoped and specced product expansion into ISEE/AP test prep and a custom-lobby B2B SaaS offering for tutoring companies.

• Won 1st place at Wharton, 2nd at Princeton TigerLaunch, and $3K Kuzneski; raised $20k pre-seed with active investor conversations at a16z, HSG, and Afore Capital.

CERTIFICATIONS & SKILLS

Certifications: Building with the Claude API, Claude Code in Action (Anthropic, 2026); Google PM Specialization (2025).
Technical & Data: Python, SQL, Java, Excel, Google Apps Script, NumPy, Data Analysis, Data Visualization & Dashboards, Machine Learning, Tableau, Pandas, Git/GitHub, APIs Data pipelines.
AI & Automation: LLM Tooling, Claude API, Agentforce, Agentic Workflow Design, Workflow Automation, API Integration
Product & Business: Product Analytics, Product Experimentation, Growth Strategy, Go-to-Market (GTM) Strategy, Competitive Analysis, Project Scoping, Cross-Functional Collaboration, Stakeholder Management
